Advances in Manufacturing Technology II Peter F. McGoldrick 2013-11-21 EN Corlett Joint-Chairman - COPED, University of Nottingham, Nottingham, UK The contributions offered to this Third National Conference demonstrate that research in production is very much alive. The considerable numbers of papers on robotics, automation and flexible manufacturing systems, together with those in production control and quality matters, demonstrate that there is much work going on in our colleges, polytechnics and universities related to modern methods of manufacture. The future of manufacture undoubtedly hinges on better control. Control over the supply and movement of materials is now keenly sought. Control over manufacturing equipment is also a goal, not just to maintain quality but to give flexibility in sequence and quantity. None of these objectives for improved performance is entirely a technical matter, although there is an increasing technical ability to influence all of them. To achieve their potential, they depend on competent people at all levels. Discussion with alert managers soon reveals that this is one of their major concerns. Either the people they have require more training, or they cannot hire the people with the abilities they need. This applies at all levels, and the availability of people with competence in manufacture is particularly low.

Transfer Pricing and Value Creation Raffaele Petruzzi 2019-09-02 Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD/G20 BEPS Project, a new, somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti-abuse provisions in international tax law. The notion of ‘Value Creation’ reframes the interpretation and application of the Arm’s Length Principle (ALP) that is embedded in Articles 7 and 9 of the OECD Model Convention. This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways. Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual context is the aim of this book. Here, law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade, automotive, consumer products, food and beverages, pharmaceutical and life sciences, telecommunications, and the key topic of value creation in a digitalized economy. Our LL.M. students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing. All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research.

Joao Carmo 2012-08-01 An automobile was seen as a simple accessory of luxury in the early

years of the past century. However, in the present days it’s undeniable the amount of technology and human effort applied by the vehicular industry for developing high-quality vehicles, but still, cheap for the common person. In this context, this book tries not only to fill a gap by presenting new and updated subjects related to the vehicular technology and to the automotive engineering but also to provide guidelines for future research. This book is a result of many valuable contributions from worldwide experts of automotive’s field. The amount and type of contributions were judiciously selected to cover as possible the widest range of research. The most recent and cutting-edge subjects can be found in this book, e.g., electronics, mechanics, materials, and manufacturing.

Gene Kim 2015-08-22 Bill Palmer wird überraschend zum Bereichsleiter der IT-Abteilung eines Autoteileherstellers befördert und muss nun eine Katastrophe nach der anderen bekämpfen. Gleichzeitig läuft ein wichtiges Softwareprojekt und die Wirtschaftsprüfer sind auch im Haus. Schnell wird klar, dass »mehr Arbeiten, mehr Prioritäten setzen, mehr Disziplin« nicht hilft. Das ganze System funktioniert einfach nicht, eine immer schneller werdende Abwärtsspirale führt dazu, dass das Unternehmen kurz vor dem Aus steht. Zusammen mit einem weitsichtigen Aufsichtsratsmitglied fängt Bill Palmer an, das System umzustellen. Er organisiert Kommunikation und Workflow zwischen Abteilungen neu, entdeckt und entschärft Flaschenhälse und stimmt sich mit dem Management besser ab. Er schafft es damit, das Ruder herumzureißen. Das Buch zeigt, wie neue Ideen und Strategien der DevOps-Bewegung konkret umgesetzt werden können und zum Erfolg führen - und liest sich dabei wie ein guter Wirtschaftskrimi!
