Harris und ich Gary Paulsen 2020-05-22 Wer sich hinter eine Kuh stellt, ist für die Folgen selbst verantwortlich ... So etwas wie die Larsons und ihre Farm hat der 11-jährige Erzähler noch nicht gesehen. Bei ihnen soll er eine Zeit lang leben, weil seine Eltern sich nicht kümmern können. Hier auf der Larsons-Farm geht es ziemlich verrückt zu: Man steht nicht nur mitten in der Nacht auf, um Kühe zu melken und Butter zu machen, nein, man muss sich vor dem geistesgestörten Hahn, der riesigen Miezekatze (einem halbwüchsigen Luchs) und der sehr eigenwilligen Kuh Vivian in Acht nehmen. Und da ist Harris, der nur ein paar Jahre jüngere Cousin. Der ist ein echter Chaot, todesmutig und voller Blödsinn im Kopf. Die beiden Jungs reiten im Schlamm auf den Schweinen, frisieren das Fahrrad zur über den Hof düsenden Rakete um und pinkeln gegen Stromzäune. Echte Freunde werden sie, mit Bauchkrämpfen vor Lachen und Hühnerkacke im Gesicht.

Summary of Noise Alexander Cooper 2021-09-25 Summary of Noise Noise: A Flaw in Human Judgment is the latest book by Daniel Kahneman, Olivier Sibony, and Cass R. Sunstein published in May 2021. The authors discussed in detail the difference between bias and noise, the different types of biases and noise, how they both contribute to error, and strategies that organizations can take in reducing or eliminating them. With particular reference to noise which is the major theme/topic of the book, the authors also discussed what is called system noise. This system noise which is the unwanted variability in judgment is comprised of three components names level, pattern, and occasion noise. The book also discussed some objections people or organizations might have towards implementing noise-reduction strategies which they referred to as decision hygiene. It also covers the place of machine learning algorithms and/or artificial intelligence in reducing noise, and how they too are not free from noise or bias. CMOS Integrated Lab-on-a-chip System for Personalized Biomedical Diagnosis Hao Yu 2018-04-04 A thorough examination of lab-on-a-chip circuit-level operations to improve system performance A rapidly aging population demands rapid, cost-effective, flexible, personalized diagnostics. Existing systems tend to fall short in one or more capacities, making the development of alternatives a priority. CMOS Integrated Lab-on-a-Chip System for Personalized Biomedical Diagnosis provides insight toward the solution, with a comprehensive, multidisciplinary reference to the next wave of personalized medicine technology. A standard complementary metal oxide semiconductor (CMOS) fabrication technology allows mass-production of large-array, miniaturized CMOS-integrated sensors from multi-modal domains with smart on-chip processing capability. This book provides an in-depth examination of the design and mechanics considerations that make this technology a promising platform for microfluidics, micro-electro-mechanical systems, electronics, and electromagnetics. From CMOS fundamentals to end-user applications, all aspects of CMOS sensors are covered, with frequent diagrams and illustrations that clarify complex structures and processes. Detailed yet concise, and designed to help students and engineers develop smaller, cheaper, smarter lab-on-a-chip systems, this invaluable reference: Provides clarity and insight on the design of lab-on-a-chip personalized biomedical sensors and systems Features concise analyses of the integration of microfluidics and micro-electro-mechanical systems Highlights the use of compressive sensing, super-resolution, and machine learning through the use of smart SoC processing Discusses recent advances in complementary metal oxide semiconductor-integrated lab-on-a-chip systems Includes guidance on DNA sequencing and cell counting applications using dual-mode chemical/optical and energy harvesting sensors The conventional reliance on the microscope, flow cytometry, and DNA sequencing leaves diagnosticians tied to bulky, expensive equipment with a central problem of scale. Lab-on-a-chip technology eliminates these constraints while improving accuracy and flexibility, ushering in a new era of medicine. This book is an essential reference for students, researchers, and engineers working in diagnostic circuitry and microsystems.

Summary of Herbert Harris' The Twelve Universal Laws of Success, Super Achiever Edition Everest Media, 2022-06-21T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The Universal Law of Thought and Manifestation states that a thought has two basic aspects: a rational aspect, which is the statement of the thought itself, and an emotional aspect, which is the personal feelings and emotions associated with the thought. #2 Your self-image is the starting point of your life experiences. It is the mental and emotional picture you hold in your own consciousness of a who you are, what you are about, and what you represent. Your self-image determines your capacity to give, receive, and interact with the life experiences and possibilities that confront you. #3 The first seven years of a child's life are crucial for their development of the basic system of values that will take them through life. It is during this period that the child learns and develops emotions and feelings of fear and reward, pain and pleasure, love and lack of love, guilt, blame, and shame. #4 Your environment is a strong influence on your self-image because it is a source of validation and confirmation. If you have a poor self-image, you will live and work in a run-down area, in a poorly maintained home, in an otherwise negative environment.

Summary of Gabrielle Bernstein's Super Attractor: Methods for Manifesting a Life Beyond Your Wildest Dreams Milkyway Media 2021-06-03 Buy now to get the key takeaways from Gabrielle Bernstein's Super Attractor: Methods for Manifesting a Life Beyond Your Wildest Dreams. Sample Key Takeaways: 1) There is no such thing as a meaningless thought. Each thought we have emits energy and can manifest in our life on some level. That energy can either draw us closer to the supportive flow of the Universe or pull us farther away from it. 2) When we allow ourselves to be controlled by fear-based, low-energy thoughts, we become misaligned with the Universe. When we're misaligned, we try to exert control over our circumstances. We're resentful, have low energy, and feel physically sick. It's difficult to get things done and our creativity is stifled.

A Medic's Mind Matthew Heneghan 2022-07-11 " A riveting read of the difficult and important things of what medics do. " Matthew Heneghan doesn't see people at their best. Instead, they come to him in desperate need. The experience of needing a medic can be like waking up in a foreign country. You frantically want to know, "What is happening with me?" The ability to reassure people, to give the foreign country a 'name,' helps people. Author Matthew Heneghan always knew he wanted to be a medic. In this raw new medical memoir, he interweaves the stories of his growing up with the brutal realities of living with life and death each day. With sensitive observation and graceful writing, this book explores the highs and lows of being a paramedic in a world where everything is not always what it seems. Matthew writes that being a paramedic caused his 'soul to bleed.' It is not about the practicalities of the job but about the evil of the world that he is forced to see day after day. He calls himself part of the 'walking wounded.' In 'A Medic's Mind -Love, Loss and All Things in between,' Matthew Heneghan writes of the life-altering experiences and other struggles he faced in his journey to becoming a good medic - from being a youth in a home where his mom struggled with mental illness, to his medic training in the United States army. He tells of exhausting shifts as a paramedic and coming face-to-face with his own mortality and the socioeconomic dilemmas of his patients. It is a read not to be missed!
