Communicating With Intelligence James S. Major 2008-03-27 Since September 11, 2001, colleges and universities nationwide have expanded their curricula to include intelligence and national security studies, many offering degrees in the subjects. Curiously, no book exists for classroom use in teaching the important skills needed by these professionals to ensure their products/papers/reports are properly written or briefed. Communicating with Intelligence fills that gap and is aimed primarily at faculty and students pursuing studies in intelligence, national security, homeland security, or homeland defense; but it also has considerable value for working intelligence professionals who simply wish to hone their "rusty" writing or briefing skills.

Teach Writing Well Ruth Culham 2018 Ask successful writers and they'll tell you, the key to writing well is revision. Ask elementary school teachers and they'll tell you, the real challenge of writing instruction is teaching kids how to revise. Ruth Culham is both a successful writer and a writing teacher, and she's discovered how to teach writing and revision in a way that's accessible to both teacher and students: First read the writing, assess it using the traits of writing, then teach the writers and guide revision decisions using traits as a common language and map. This book shows you how to assess and teach writing in a way that's practical and doable--and best of all, see results. Part 1 walks you through the traits of writing and their key qualities, showing step by step how to read students' writing and offer feedback that nudges them forward through the revision process. Chapters will help you address challenges students face within each mode of writing (narrative, expository, persuasive), and provide tools young writers can use to evaluate their own writing and make revision decisions accordingly. Part 2 dives into instruction, offering specific guidance for how to use what you've learned from reading student writing to design lessons that scaffold students toward making their own craft decisions and revisions. In addition, there's an entire chapter devoted to mentor texts that you can use to model traits and key qualities for your students.

The Well-Trained Mind: A Guide to Classical Education at Home (Fourth Edition) Susan Wise Bauer

2016-08-09 Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in The Well-Trained Mind to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.

The Writing Workshop Teacher's Guide to Multimodal Composition (6-12) Angela Stockman 2022-05-31

Multimodal composition is a meaningful and critical way for students to tell their stories, make good arguments, and share their expertise in today's world. In this helpful resource, writer, teacher, and best-selling author Angela Stockman illustrates the importance of making writing a multimodal endeavor in 6-12 workshops by providing peeks into the classrooms she teaches within. Chapters address what multimodal composition is, how to situate it in a writing workshop that is responsive to the unique needs of writers, how to handle curriculum design and assessment, and how to plan instruction. The appendices offer tangible tools and resources that will help you implement and sustain this work in your own classroom. Ideal for teachers of grades 6-12, literacy coaches, and curriculum leaders, this book will help you and your students reimagine what a workshop can be when the writers within it produce far more than written words.

Microeconomics David Besanko 2020-05-19 Microeconomics is a classroom-tested resource for learning the key concepts, essential tools, and applications of microeconomics. This leading textbook enables students to recognize and analyze significant data, patterns, and trends in real markets through its integrated, student-friendly approach to the subject — providing practice problems, hands-on exercises, illustrative examples, and engaging applications that ground theory firmly in the real world. Each chapter, opening with a set of clearly defined learning goals based on the Bloom Taxonomy, features numerous Learning-by-Doing (LBD) problems, mathematical and graphical data, and varied problem sets focused on current events. Now in its sixth edition, the text offers extensive new and revised content throughout. All applications reflect current data and important new developments in the field of economics, including behavioral economics, randomized controlled trials (RCTs) in policy evaluation and design, and computational-based microeconomics. Updated chapter openers, designed to increase student interest, cover topics including the economic impacts of climate change, U.S. household income and spending, surge pricing by Uber and Lyft, the effect of immigration on wages, and advances in robotics, automation, artificial intelligence, and more.

The Chicago Handbook for Teachers, Second Edition Alan Brinkley 2011-06-15 Representing teachers at all stages of their careers, authors offer practical advice for almost any situation a new teacher might face, from preparing a syllabus to managing classroom dynamics. From publisher description.

Research in Basic Writing Michael G. Moran 1990 This reference handbook surveys research on the central issue associated with the teaching of unprepared writers. Though basic writing has only been recognized as a distinct area of teaching and research since 1975, the existing bibliographic texts already seem limited due to their age or lack of annotation. This volume provides current and extensive bibliographic essays and will help to define this new field of study for teachers and researchers. Following an introduction that summarizes the origins and significant texts in basic writing, the book is divided into three sections, Social Science Perspectives, Linguistic Perspectives, and Pedagogical Perspectives. The first section, which contains three essays, views the field through the lens of social, psychological, and political issues. The second section, also containing three essays, examines contributions made from studies of grammar, dialects, and second-language acquisition. The third section, in its four essays, focuses on the design, development, administration, and evaluation of basic writing courses, the use of computers in basic writing classrooms, the role of the writing lab, and the preparation of basic writing teachers. An appendix that reviews current textbooks for basic writing courses is also included, as well as an index. This book will be a valuable resource for teachers of basic writing, in education courses and workshops that train teachers and tutors, and in fields such as linguistics, technical writing, and Teaching English as a Second Language. It will also be an important addition to public and university libraries and many education programs.

The Joy of Teaching Harry Hazel 2010-01-01 Over the centuries, multitudes of women and men have gone into teaching as their chosen profession. Most successful instructors find joy in teaching and are glad to share that joy with others. Harry Hazel is one teacher who has found his forty years in the classroom highly satisfying. In this book, he not only includes insights from other Canadian and American teachers he once

interviewed, but he primarily reflects on a long and happy career. While the material in this book is slanted toward college teaching, many of the techniques could also be applied to other levels of instruction, such as elementary, secondary, or adult education. Key principles include Motivating yourself Motivating students Polishing your speaking skills Taking the pain out of writing Making the joy last
