Yearning to Breathe Free Andrew Billingsley 2021-03-05 A sociological approach to appreciating the heroism and legacy of the Gullah statesman On May 13, 1862, Robert Smalls (1839-1915) commandeered a Confederate warship, the Planter, from Charleston harbor and piloted the vessel to cheering seamen of the Union blockade, thus securing his place in the annals of Civil War heroics. Slave, pilot, businessman, statesman, U.S. congressman—Smalls played many roles en route to becoming an American icon, but none of his accomplishments was a solo effort. Sociologist Andrew Billingsley offers the first biography of Smalls to assess the influence of his families—black and white, past and present—on his life and enduring legend. In so doing, Billingsley creates a compelling mosaic of evolving black-white social relations in the American South as exemplified by this famous figure and his descendants. Born a slave in Beaufort, South Carolina, Robert Smalls was raised with his master's family and grew up amid an odd balance of privilege and bondage which instilled in him an understanding of and desire for freedom, culminating in his daring bid for freedom in 1862. Smalls served with distinction in the Union forces at the helm of the Planter and, after the war, he returned to Beaufort to buy the home of his former masters—a house that remained at the center of the Smalls family for a century. A founder of the South

Carolina Republican Party, Smalls was elected to the state house of representatives, the state senate, and five times to the United States Congress. Throughout the trials and triumphs of his military and public service, he was surrounded by growing family of supporters. Billingsley illustrates how this support system, coupled with Smalls's dogged resilience, empowered him for success. Writing of subsequent generations of the Smalls family, Billingsley delineates the evolving patterns of opportunity, challenge, and change that have been the hallmarks of the African American experience thanks to the selfless investments in freedom and family made by Robert Smalls of South Carolina.

Computer Applications to Library Kole Lambert A library computer system is the software used to catalog, track circulation (where appropriate), and inventory a library's assets. It is intended for home, church, private enterprise, and other small- to medium-sized collections. Larger libraries typically use an integrated library system to manage the more-complex activities, such as acquisitions, interlibrary loan, and

licensing online resources. With distributed software the customer can choose to self-install or to have the system installed by the vendor on their own hardware. The customer can be responsible for the operation and maintenance of the application and the data, or the customer can choose to be supported by the vendor with an annual maintenance contract. Some vendors charge for upgrades to the software. Customers, who subscribe to a web (hosted) service, upload data to the vendors remote server through the Internet and may pay a periodic fee to access their data. Modern libraries are constituted within and by a tradition of techniques and practices that represent a hundred years of codified professional knowledge. This book provides a historical overview of this tradition that created a complex environment of expectation and misunderstanding for introducing library automation. This book attempts to delineate and discuss the applications of the computer that have been behind the technological revolution of library science. The aim of the book is to mainly enhance the readers' understanding of the ways in which computers have heralded the invasion of technology into library science, with special attention to the emergence of digital libraries which promise to make libraries and their information completely at the mercy of our fingertips.

Many of us have vivid recollections of childhood visits to a public library: the unmistakable musty scent, the excitement of checking out a stack of newly discovered books. Today, the more than 17,000 libraries in America also function as de facto community centers offering free access to the internet, job-hunting assistance, or a warm place to take shelter. And yet, across the country, cities large and small are closing public libraries or curtailing their hours of operation. Over the last eighteen years, photographer Robert Dawson has crisscrossed the country documenting hundreds of these endangered institutions. The Public Library presents a wide selection of Dawson's photographs— from the majestic reading room at the New York Public Library to Allensworth, California's one-room Tulare County Free Library built by former slaves. Accompanying Dawson's revealing photographs are essays, letters, and poetry by some of America's most celebrated writers. A foreword by Bill Moyers and an afterword by Ann Patchett bookend this important survey of a treasured American institution.

Part of Our Lives Wayne A. Wiegand 2015-09-10 Despite dire predictions in the late twentieth century that public libraries would not survive the turn of the millennium, their numbers have only increased. Two of three Americans frequent a public library at least once a year, and

nearly that many are registered borrowers. Although library authorities have argued that the public library functions primarily as a civic institution necessary for maintaining democracy, generations of library patrons tell a different story. In *Part of Our Lives*, Wayne A. Wiegand delves into the heart of why Americans love their libraries. The book traces the history of the public library, featuring records and testimonies from as early as 1850. Rather than analyzing the words of library founders and managers, Wiegand listens to the voices of everyday patrons who cherished libraries. Drawing on newspaper articles, memoirs, and biographies, *Part of Our Lives* paints a clear and engaging picture of Americans who value libraries not only as civic institutions, but also as public places that promote and maintain community. Whether as a public space, a place for accessing information, or a home for reading material that helps patrons make sense of the world around them, the public library has a rich history of meaning for millions of Americans. From colonial times through the recent technological revolution, libraries have continuously adapted to better serve the needs of their communities. Wiegand demonstrates that, although cultural authorities (including some librarians) have often disparaged reading books considered not "serious," the commonplace reading materials users obtained from public libraries have had a transformative effect for many, including people such as Ronald Reagan, Bill Moyers, Edgwin Danticat, Philip Roth, Toni Morrison, Sonia Sotomayor, and Oprah Winfrey. A bold challenge to conventional thinking about the American public library, *Part of Our Lives* is an insightful look into one of America's most beloved cultural institutions.

Golden House Salman Rushdie 2017-09-05 Seit "Fegefeuer der Eitelkeiten" gab es keinen Roman mehr, der unsere Zeit so treffend, unterhaltsam und weitsichtig erklärt. Nero Golden kommt aus einem Land, dessen Namen er nie wieder hören wollte, seit er mit seinen drei erwachsenen Söhnen vor ein paar Jahren nach New York gezogen ist und sich eine junge Russin zur Frau genommen hat. Der junge Filmemacher René wohnt im Nachbarhaus und ist fasziniert von der Familie, die ihm besten Stoff für ein Drehbuch liefert: Aufstieg und Fall eines skrupellos ehrgeizigen, narzisstischen und mediengewandten Schurken, der Make-up trägt und sich die Haare färbt. René wird Zeuge und in einer folgenschweren Episode sogar Teilhaber des dekadenten Treibens im Golden House, dessen Besitzer nicht nur den Vornamen mit Kaiser Nero teilt ... Salman Rushdie erfasst den irritierenden Zeitgeist und zeichnet mit größter Erzählkunst ein treffendes Bild unserer heutigen Welt. Dieser Roman beweist aufs Neue, dass er einer der besten Geschichtenerzähler unserer Tage ist.

The Decisive Network Nadya Bair 2020-07-07 Since its founding in 1947, the legendary Magnum Photos agency has been telling its own story about photographers who were witnesses to history and artists on the hunt for decisive moments. Based on unprecedented archival research, *The Decisive Network* unravels Magnum's mythologies to offer a new history of what it meant to shoot, edit, and sell news images after World

War II. Nadya Bair shows that between the 1940s and 1960s, Magnum expanded the human-interest story to global dimensions while bringing the aesthetic of news pictures into new markets. Working with a vast range of editorial and corporate clients, Magnum made photojournalism integral to postwar visual culture. But its photographers could not have done this alone. By unpacking the collaborative nature of photojournalism, this book shows how picture editors, sales agents, spouses, and publishers helped Magnum photographers succeed in their assignments and achieve fame. Bair concludes in the late 1960s and early 1970s, when changing market conditions led Magnum to consolidate its brand. In that moment, Magnum's photojournalists became artists and their assignments oeuvres. Bridging art history, media studies, cultural history, and the history of communication, *The Decisive Network* transforms our understanding of the photographic profession and the global circulation of images in the predigital world.

Magnum Russell Miller 2010-08-03 This book is a biography of Magnum, told largely in the words of its photographers. It offers a unique perspective on half a century of world history from an extraordinary group of men and women who were front line witnesses at virtually every major event in the last fifty years. Wars, famines, natural disasters, social, political and environmental crises - Magnum photographers were there. They have been acute observers of the human condition, photographing the richest people in the world, the poorest, the least known and the most celebrated, from Marilyn Monroe to Che Guevara, JFK to Nelson Mandela, Picasso to Krushchev. This is a multi-layered story. At one level, it tells how a small group of photographers - among them Robert Capa, Henri Cartier-Bresson and George Rodger - came together, established and nurtured a co-operative photographic agency that has survived against all the odds to become the most famous in the world. At a secondary level, it is the richly anecdotal story of the photographers themselves, their adventures around the world and their feelings about, and reactions to, their assignments.

24-Hour Cities Hugh F. Kelly 2016-07-15 Winner of the Gold Award in the Tenth Annual Robert Bruss Real Estate Book Competition 24 Hour Cities is the very first full length book about America's cities that never sleep. Over the last fifty years, the nation's top live-work-play cities have proven themselves more than just vibrant urban environments for the elite. They are attracting a cross-section of the population from across the U.S. and are preferred destinations for immigrants of all income strata. This is creating a virtuous circle wherein economic growth enhances property values, stronger real estate markets sustain more reliable tax bases, and solid municipal revenues pay for better services that further attract businesses and talented individuals. Yet, just a generation ago, cities like New York, Boston, Washington, San Francisco, and Miami were broke

(financially and physically), scarred by violence, and prime examples of urban dysfunction. How did the turnaround happen? And why are other cities still stuck with the hollow downtowns and sprawling suburbs that make for a 9-to-5 urban configuration? Hugh Kelly's cross-disciplinary research identifies the ingredients of success, and the recipe that puts them together.

Play Among Books Miro Roman 2021-12-06 How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an "infinite flow" of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.
